

Digital collaboration means faster innovation.

Introducing Anark Collaborate, the world's only digital collaboration platform that not only understands engineering data like BoM, 3D, and CAD but makes it instantly available to any user on any device. When everyone has secure, barrier-free access to the data they need to do their best work, everyone can innovate faster.

3 Reasons Why Anark Collaborate Means Faster Innovation

Secure, mobile-first access for everyone

Upload and share files with markup and instant chat

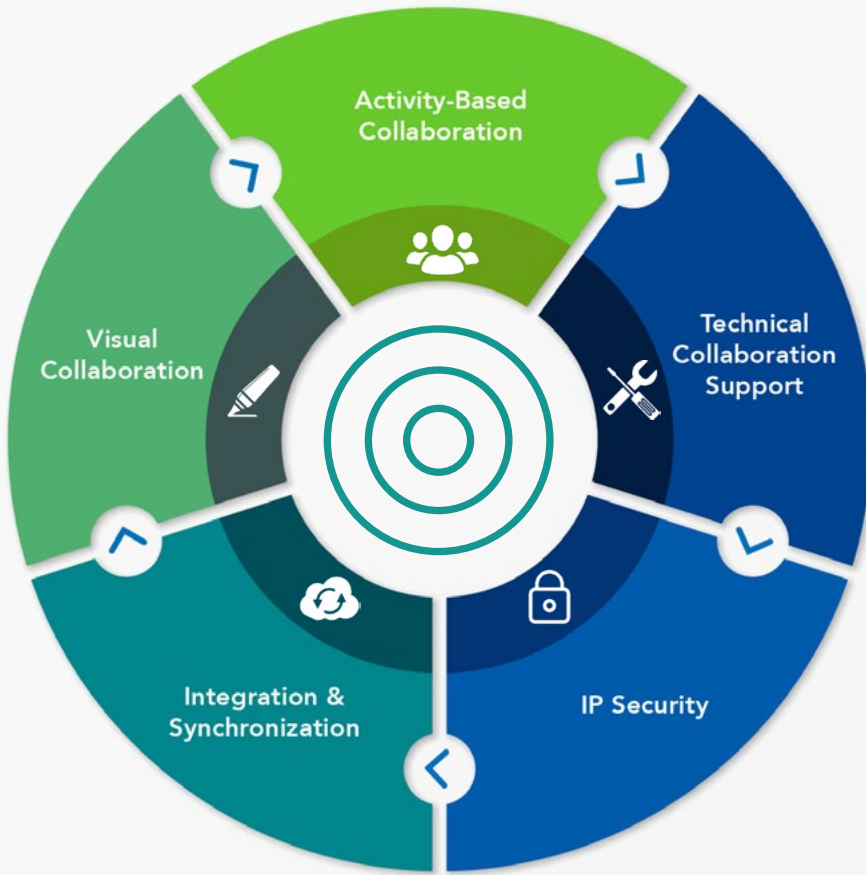

Trace communication so nothing gets missed, ever

Anark.com/collaborate

 **ANARK**[®]
Innovate faster.

Innovate Faster with All-in-One Capabilities

Anark Collaborate Core Capabilities

- **Activity-Based Collaboration**
supports engineering, manufacturing, supply chain, field service use cases
- **Technical Collaboration Support**
for technical data types, including BOM data, 3D, 2D, images, videos
- **IP Security**
featuring fine-grained access control, traceability for IP security
- **Integration & Synchronization**
with leading CAD and PLM systems, plus ERP, other data sources
- **Visual Collaboration**
with traceable conversation threads, real-time chat, and markups

Anark Collaborate Advantages

How will Anark Collaborate transform the way you work? By delivering distinct advantages compared to traditional methods of file sharing and collaboration:

vs. Content Collaboration

- Technical data markups (BOM, 3D, CAD and more)
- Simple, traceable discussions
- Session-aware watermarking
- PLM synchronization

vs. Email and Chat Tools

- Traceable fine-grained access control
- File-less IP security
- Technical data visual collaboration (BOM, 3D, CAD and more)
- Time-limited access

vs. PDM / PLM

- Modern, intuitive experience
- Multi-system (PLM, ERP, and more) support
- Technical data package (TDP) automation
