Compare Vidia

COMPARE AND VALIDATE
YOUR CAD MODELS

OVERVIEW

CompareVidia is an easy-to-use application for validating and comparing CAD models. A simple workflow enables you to load two CAD models and compare them based on your criteria. Models are classified as either PASSED or FAILED. A report is automatically generated to digitally certify compliance with standards like Boeing's D6-51991 "Quality Assurance Standard for Digital Product Definition".

The preferred solution for leading manufacturers, CompareVidia delivers an efficient, powerful, and automatic way to validate CAD model integrity at different stages of the digital product life cycle.
